Box No. I Basis of the report	
 With regard to the language, this report is based on the international application in the language otherwise indicated under this item. 	
This report is based on translations from the original language into the following language	guage
which is the language of a translation furnished for the purposes of:	
international search (under Rules 12.3 and 23.1(b))	
publication of the international application (under Rule 12.4)	·
international preliminary examination (under Rules 55.2 and/or 55.3)	
 With regard to the elements of the international application, this report is based on (replace to the receiving Office in response to an invitation under Article 14 are referred to in this reannexed to this report): the international application as originally filed/furnished 	ment sheets which have been furnished eort as "originally filed" and are not
the description:	as originally filed/furnished

4. This report has been established as if (some of) the amendments annexed to this re made, since they have been considered to go beyond the disclosure as filed, as independent of the description, pages the claims, Nos.	
the drawings cheets	
the assumption (engelfy):	
any table(s) related to sequence listing (specify):	
* If item 4 applies, some or all of those sheets may be marked "superseded."	

International application No. PCT/KR2004/001073

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Statement			
Novelty (N)	Claims	1-17	 YES
	Claims	NONE	 NO
Inventive step (IS)	Claims	1-11, 13-17	 YES
	Claims	12	NO
Industrial applicability (IA)	Claims	1-17	YES
	Claims	NONE	NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: US 2003/0028892 A1

D2: JP 10-136314 A

D3: EP 1076461 A1

D4: EP 1089565 A2

1. Novelty and Inventive Step

D1 discloses a method and apparatus for providing customers with media contents combined with enhanced, interactively-obtained media contents. D2 relates to an interactive video reproducing device for improving operability in a network standby state by reproducing data corresponding to a reproducing procedure of the specified condition. D3 relates to a process for synchronizing an MPEG decoder for decoding compressed data originating from a recording medium. D4 relates to a transport stream recording/reproducing apparatus and a recording medium for realizing prompt random access reproduction in response to a user's command.

With regard to Claims 1, 6 and 9, the subject matter of these claims is regarded as reproducing an AV data in synchronization with predetermined markup data related to the AV data by receiving location information of video data and calculating a reproduction location of markup data related to the video data.

The subject matter of Claims 11, 16 and 17 is regarded as a recording medium according to Claims 1, 6 and 9.

The subject matter of Claim 12 is regarded as a recording medium having an audio data structure including synchronization information and audio data. But it is obvious to a person skilled in the art to combine D4 with D3 to arrive at Claim 12. Therefore, Claim 12 does not involve an inventive step.

(Continued on the Supplemental sheet.)

International application No.

PCT/KR2004/001073

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 13-15, which are dependent claims of Claim 12, refer to "the method of Claim 12", but Claim 12 relates to a recording medium on which audio data has been recorded.

International application No.

PCT/KR2004/001073

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of:

Box V.

The other claims comply with PCT Article 33(2) and (3).

2. Industrial Applicability

Claims 1-17 meet the criteria set out in PCT Article 33(4).

These claims are directed to a method and apparatus for receiving audio data using a hyper text transport protocol(HTTP) and an audio data structure used for the apparatus and method.
